MUBEEN ABDUL

JR. JAVA BACKEND DEVELOPER

CONTACT

Full-name: Abdul Mubeen
80-083-72473
Mubeenabdul1999@gmail.com

SKILLS

Java
Spring Boot
REST, GQL
Junit & Wire mock
SQL
Monitoring and alerting systems
like – Splunk and Grafana

EDUCATION

Rajiv Gandhi University of
Knowledge and Technologies-
IIIT
2016-2022
Integrated B-Tech (2+4)
1. B-Tech: CSE
2. Pre University - MPC

PROFILE

I am a skilled backend developer with over a year of experience in designing and implementing robust systems using Java and Spring Boot. I specialize in building enterprise-grade REST and GraphQL APIs, solving complex problems, and optimizing backend processes. Currently, I contribute to the Seller Center Backend for Walmart's E-commerce platform, where I focus on order fulfillment, returns, and dispute resolution. I am proficient in modern development practices and tools, ensuring high-quality and efficient software solutions.

EXPERIENCE   (14 MONTHS)

MThree | JAVA Junior Backend Developer – SDE
May 2024 - Present
Worked for the client **Walmart** on the Seller Fulfillment project. Contributed to the development of new features and enhanced overall code quality by adding comprehensive unit and functional tests for feature changes. As part of on-call support responsibilities, addressed and resolved production issues, while actively monitoring system metrics to ensure stability and performance.
Gained experience in Git version control and CI/CD pipelines for software deployment.

INTERNSHIPS
Feb 2024 – April 2024
Internship on Software Development Engineering
Developed full-stack applications using Java, Spring Boot, React, and MySQL, Built and optimized RESTful APIs, and backend solutions. Implemented Data Structures & Algorithms (DSA) to improve code efficiency,
Gained exposure to cloud computing, specifically Microsoft Azure, where I deployed applications and managed cloud resources. This experience allowed me to understand cloud security best practices and infrastructure management while exploring serverless computing and scalable cloud-based solutions
